Main Themes and Topics

The ideas cover various topics related to Conga Collaborate, including:

- Feature enhancements and additions (e.g., mass canceling sent transactions, tracking changes, parallel signing)
- Performance improvements (e.g., loading speed of files)
- UI/UX improvements (e.g., renaming reference pages, more detailed error messages)
- Access control and permissions (e.g., admin access to edit locked pages, preventing deleted people from accessing proposals)
- Integration with other tools and formats (e.g., Excel JS macro support, checkbox functionality)
- Localization and language support

Top 3 Ideas by Votes

1. "Parallel Signing with Collaborate Integration with Conga Sign" by Johnny Checton (3 votes)
2. "I suggest removing all legacy references to any form of "tinder" in the new Conga Revenue Lifecycle Cloud." by Tom Menke (3 votes)
3. "Admin access to edit locked page in Collaborate" by Mark Turner (3 votes)

Comment Sentiment Analysis

The overall sentiment of the comments is neutral to slightly positive. Most comments are either providing additional context, asking for clarification, or acknowledging the idea's submission. There are no notably negative comments.

Notable Patterns and Insights

- Many ideas focus on enhancing existing features or adding new ones to improve usability and efficiency.
- Several ideas relate to access control and permissions, indicating a need for more granular settings.
- Integration with other tools and formats is a recurring theme, suggesting a desire for better interoperability.
- Performance and UI/UX improvements are also common, highlighting the importance of a smooth and intuitive user experience.
